Summary: With over ten years experience in management and leadership and three years experience in web development, I know organizational information needs.

Employment:

Freelance Web
Design

2001-Present

Designed database application backend and ASP web application front-end to create courseware and student registration management system for The George Washington University (<http://politicalgovernance.org/>).

Organization and
Team Web
Designer

Defense Mapping School 1999-Present

Designed, implemented and managed two primary sites. School site (<http://www2.nima.mil/home.asp>) serves as worldwide access to course catalog, instructor travel, and training request. Site allows data management and editing with a closed intranet and public data display for over 150 instructors training 3000 students annually. Team intranet (<http://goldweb.nima.mil/dms/gist/index.asp>) allows tracking and metrics of information services maintenance and geospatial data inventory management system.

Instructor

Defense Mapping School 1999-Present

Instructor of geospatial information and services at the only Department of Defense joint school for geospatial intelligence. Trains approximately 600 students globally and locally in understanding digital geospatial data and exploitation techniques. Developed distributive learning products to assist in training effort.

Manager/Leader

US Army, Corps of Engineers 1991-Present

Served in positions of leadership and management as sole caretaker and manager of up to 200 personnel, \$34.2 million in property, logistics, and training. Deployed units with minimal assistance, both in the United States and Europe, to destinations in the Caribbean, Bosnia, Albania, and Kosovo.

Education:

MS

University of Missouri-Rolla
Engineering Management, 1996

BS

Northeastern University
Geology, 1991
